

HAN YU KYAW

Data Analyst | Japan

hanyu9217@gmail.com | github.com/han-yu-kyaw | linkedin.com/in/han-yu-kyaw-569605369/

PROFESSIONAL SUMMARY

Data analyst with experience cleaning and classifying text data, building interactive dashboards, and presenting practical recommendations. Completed a member needs analytics internship spanning PostgreSQL data extraction, data preparation, text classification, and Streamlit dashboard development; additional projects cover hotel guest sentiment and sales forecasting.

TECHNICAL SKILLS

Analysis: Python, pandas, SQL, PostgreSQL, SQLAlchemy, Excel, exploratory analysis, text classification, forecasting

Visualization: Streamlit, Power BI, Tableau, IBM Cognos, dashboard development

Additional: R, HTML, CSS, JavaScript; stakeholder presentations

WORK EXPERIENCE

Data Analyst Intern | alliz | Aug 2026 - Sep 2026 | Remote

- Connected to a read-only PostgreSQL database with Python and SQLAlchemy, queried member profile data, and prepared anonymized records for analysis.
- Cleaned and classified free-text goals, interests, and opportunities, with manual review for ambiguous responses.
- Developed a Streamlit dashboard with CSV upload, interactive filters, category summaries, and a manual review view.
- Presented findings and recommendations to supervisors and prepared a handover guide for future updates.

World Ambassador | Beppu City Hall | Jun 2026 - Present | Beppu, Japan

- Facilitate English conversations and cross-cultural learning activities with junior high school students.

Operations & Guest Experience Intern | ANA Crowne Plaza Hotel Kobe | Aug 2025 - Sep 2025 | Kobe, Japan

- Supported guest service and documented operational workflows in an international hotel environment.
- Applied hospitality knowledge to a later independent analysis of guest review themes.

SELECTED PROJECTS

alliz Member Needs Analytics Dashboard | Internship project | PostgreSQL, Python, Streamlit

Developed an end-to-end member analytics workflow, from database retrieval and anonymization to text classification, dashboard development, and recommendations for stakeholders.

- Connected to a read-only PostgreSQL database using Python and SQLAlchemy; retrieved relevant member profile data for analysis.
- Cleaned and anonymized extracted records, standardized free-text categories, and flagged unclear entries for manual review.
- Built interactive filters, summaries, and recurring-keyword views to support exploration of member needs and interests.
- Presented findings and recommendations, and documented how to refresh the dashboard with updated CSV data.

Kyoto Hotel Guest Sentiment Analysis | Python, Excel

- Cleaned and analyzed hotel reviews to compare guest sentiment across hotel tiers and identify common satisfaction drivers.
- Created an Excel dashboard to communicate differences in guest experience.

Annual Retail Sales Performance & Forecast Report | Python, Excel

- Analyzed sales trends, tracked KPIs, and produced a monthly revenue forecast for planning.

Student Enrollment Management System | HTML, CSS, JavaScript, SQL

- Designed a web-based interface for student registration and organized records with validation rules.

EDUCATION

Bachelor of Sustainability and Tourism | Ritsumeikan Asia Pacific University | Expected Sep 2027
